About

Computer Science & Engineering student at the Military Institute of Science and Technology (MIST), focused on backend development and software engineering fundamentals. Enjoys designing RESTful APIs, modeling relational databases, and building server-side applications that are secure, maintainable, and ready to scale. Outside of coding, into gaming, cricket, football, movies, and traveling.

Education

B.Sc. in Computer Science & Engineering — Military Institute of Science and Technology (MIST)
Present

Skills

Frontend: HTML, CSS, Tailwind CSS, JavaScript, TypeScript

Backend: Node.js, Express.js, Prisma ORM, REST API Design, JWT Authentication

Database: PostgreSQL, MongoDB, Database Design

Tools: Git, GitHub, Postman, VS Code

Currently Learning: Docker, Next.js, System Design

Projects

Backend Authentication API (DevPulse)

Secure authentication system with JWT tokens, password hashing, and role-based authorization for multi-user applications. Live: dev-pulse-ashen-zeta.vercel.app (Node.js, Express, Prisma, PostgreSQL, JWT)

Justice Tracker API

RESTful API for managing petitioners, lawyers, and judges with structured data models and full CRUD operations. (Node.js, Express, Prisma, PostgreSQL)

E-Commerce Backend

Full backend API supporting user authentication, product catalog, order management, and payment status tracking. (Express, Prisma, PostgreSQL)

Football Ticket Booking System

Relational database design for match ticketing with user roles, booking management, and constraint validation. (PostgreSQL, SQL, ERD)

Experience

Industrial Training — DESCO (Dhaka Electric Supply Company Limited)

Coursework-based industrial training covering ICT and System Automation, including AMI network architecture and smart metering.
